

DET BYOx

Connecting to BYOx with Android v2.0

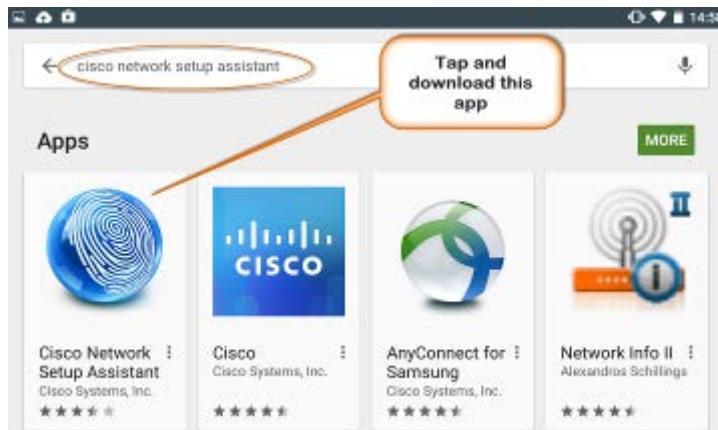

DET BYOx

Connecting with an Android device

This process outlines how staff and students with DET identities can connect to BYOx using an Android device. Different Android versions or devices, may vary slightly.

Prerequisites

- **Must** be a DET user (i.e. have a DET identity and login details).
- **Must** be added to the Staff or Student Active Directory group (<schoolcode>GG_UsrBYO<Staff/Student>).
- **Must** download and preinstall 'Cisco Network Setup Assistance' from Google Play store.

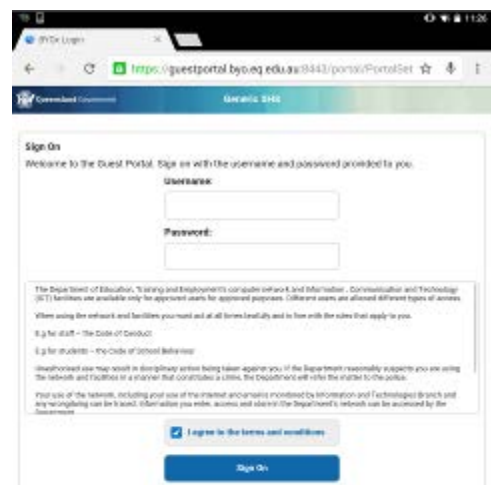

Connecting to BYOx network as a Staff member or Student

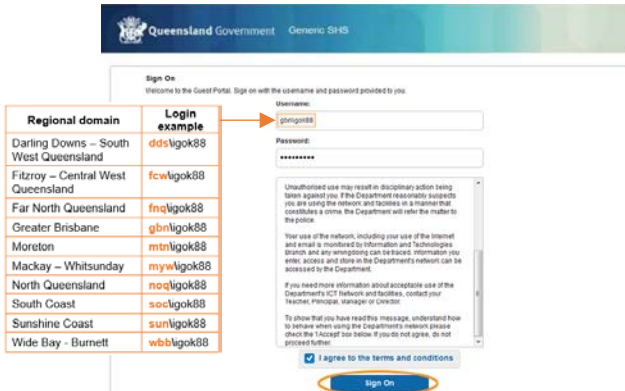

1. Access 'Settings', locate Wi-Fi Networks and select 'DETE-Guest'

2. Open a browser and attempt to navigate to a non-https site (i.e. <http://www.news.com.au/>).
3. You will be redirected to the BYOx login page.

- Enter your region code\username and password, tick "I agree to the terms and conditions" box. Then tap "Sign On" to login.

- Once your login credential has been accepted, tap "Start" button.

- Set a name for your device in the 'Description' field, then tap "Continue".

- Press Home button and tap the 'Cisco Network Setup Assistant' app installed earlier.

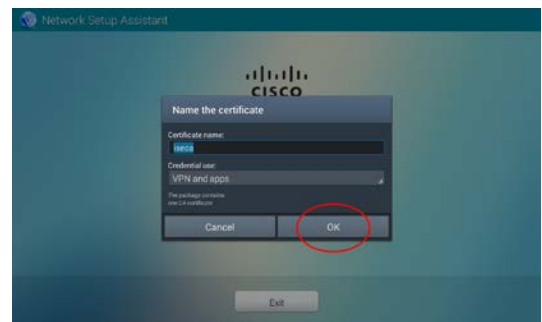

- Tap "Start"

- Tap "Proceed"

- Tap "OK" to accept the certificate.

11. The app will connect you to the DETE-BYOx network.

12. You are now on the DET BYOx network with Internet access.

13. Launch a browser and navigate to any webpage. Enter your DET network username and password when prompted and tap "Log in" button. You will be prompted to enter your DET username and password every eight hours.
